

Aluminium Bifold Doors

With the darker weather drawing in, now is the perfect time to brighten up your customer's home and our Aluk aluminium bifold doors are the ideal option. Designed for faster installation, the slim frame accommodates large panes of glass, flooding the property with light and allowing customers to enjoy panoramic views of their garden throughout the year.

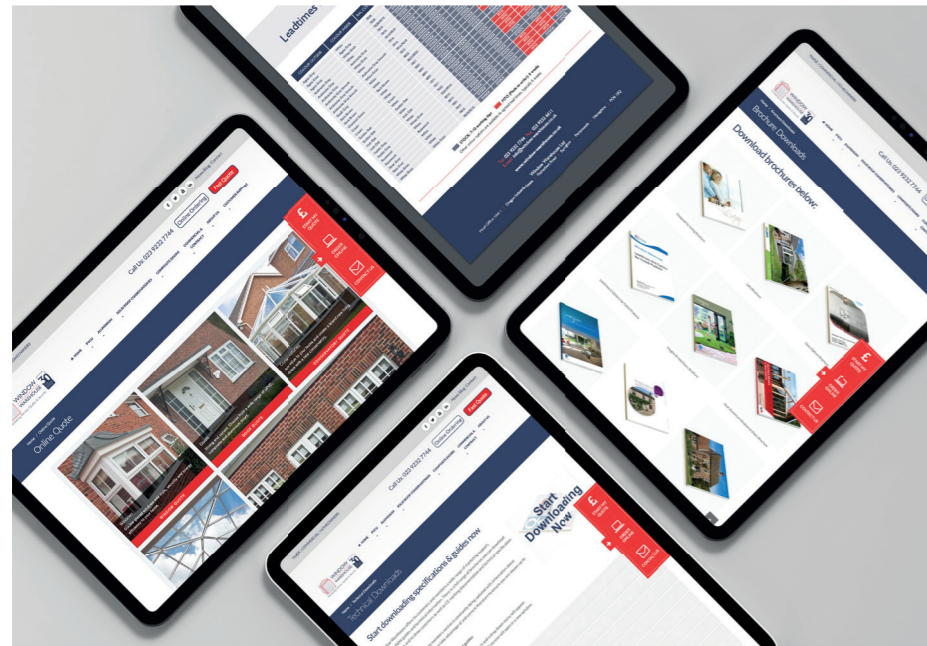

The BSF70 bifold design can easily be combined with all Aluk window and door systems that we manufacture, so it's the perfect final touch to any project. Stylish but practical, they are a great addition to any property, whether it's residential or commercial. We offer 28mm glazing as standard but this can be upgraded to triple glazed if you let us know.

Our standard stock colours are available to our installers at shorter lead times, however we offer over 400 colours with a Qualicoat surface. Both maintenance free and scratch resistance we manufacture with confidence that our bifold doors will offer many years of quality.

Making Our Installers Lives Easier

Window Warehouse has made the day-to-day lives of our customers easier by making some changes to our website, one of which is the addition of our online quoting system. You can now get a quote at a time that suits you, even when the Sales team aren't in the office.

Did you know we also have a great resource bank online? You can download both brochures and technical datasheets to use for your day-to-day business. In our downloads section you'll find information sheets on all our products as well as details on lead times, guarantees, orders forms and more.

Brand New Website

As part of our commitment to investing in the future, we're pleased to announce we will be launching a new website later this year. We've teamed up with ICAAL to deliver the project. Through our new site you'll be able to view our range of products and services.

You'll be able to enjoy quality images,

brochures, videos and more that celebrate the Window Warehouse brand. By improving our site, we will be able to create marketing materials that we can offer to our installers. Contact our team at info@window-warehouse.co.uk to find out more.

Investment Into The Company

Window Warehouse would like to thank our customers for their patience during the installation of our new machinery.

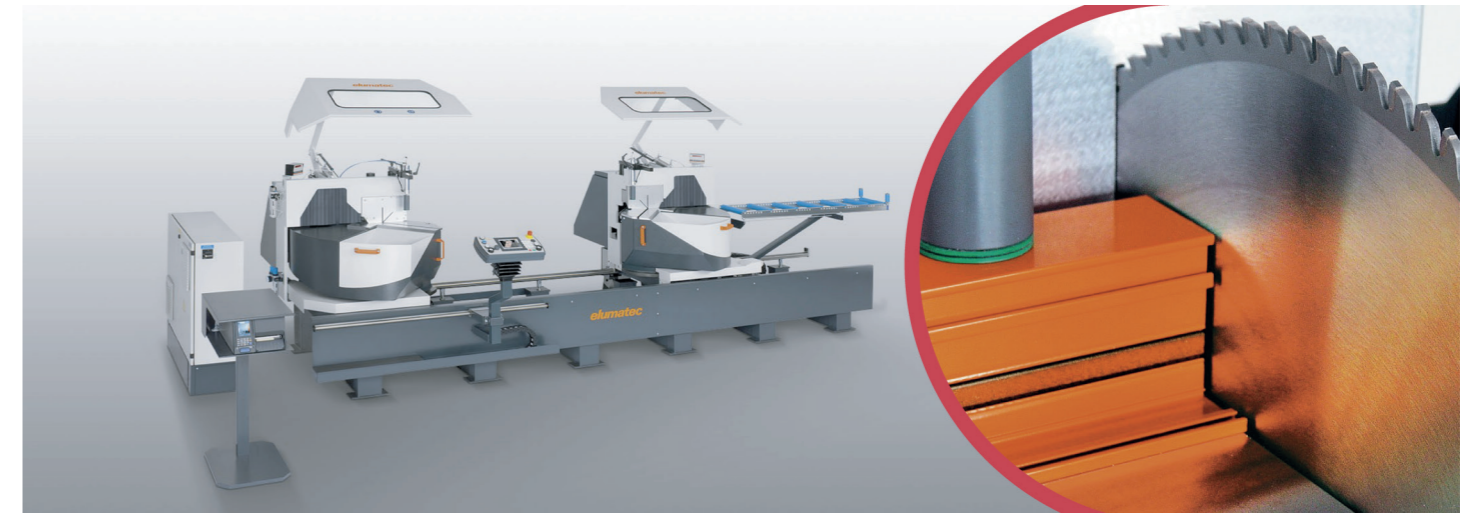

As a manufacturer, we are always looking to offer our customers the very best products and service. As part of this commitment, we are pleased to announce we have installed a new saw in aluminium

and Rotox Corner and Transom Cleaner for the uPVC side of our factory.

Through investing in machinery, we hope it gives our customers the peace of mind that we are continually committed to only offering the best. This machinery will help Window Warehouse to accommodate more orders. It will also improve the

quality of the products our customers will receive.

We have also grown our transport department by purchasing another unbranded lorry, this will allow us to deliver more orders further afield. As we branch out into uncharted territory, covering new areas.

New Leka Roof Features

Our commitment to innovation has allowed our business to make improvements to the Leka Solid Conservatory Roof System. Rather than the standard Velux window this fixed glass panel is similar to the rival Ultraframe Livinroof design.

You can now let your customer flood their conservatory with light through a fixed glass unit within the design. This system creates the illusion of more space within an extension, allowing the

homeowner to enjoy a brighter space. As well as the fixed panel the Leka Solid Conservatory Roof can now be customised with a new wire tie

bar. This tie bar offers a decorative feature to any conservatory. It also helps to reinforce the roof.

Aluminium Flush Sash Windows

Looking for a long-lasting timber replacement in your customer's home? We now offer the perfect product. Window Warehouse manufactures the AluK Optio 58BW Flush Sash system.

With its flush fitting sashes and slim sightlines, this window is the best replacement to help maintain the character of older properties.

The frames are thermally broken and direct

fix so you do not compromise on quality over style.

Available in various window configurations, you'll be able to get the perfect fit for any property. The sash is only 45mm so offers minimal aesthetic and clean sightlines, making any home look sleek.

Glazing ranges from double to triple glazed to meet all your customers demands. Making them easy to sell.

This has been emphasised by long-time Window Warehouse installer Terry Spillman. Terry, who usually orders uPVC from WW, said this on the installation: "It was very straight forward to fit them. As I had chosen authentic georgian the windows were all pre-glazed, it was no problem at all."

Congratulating a Long-Term Customer

The Window Warehouse team would like to congratulate long-term customer, All About Windows, on being named as a finalist for the Best Local Tradesperson at the Havant Small Business & Community Awards 2019/20.

All About Windows were nominated for the award by their customer base. In its fifth year, the awards recognise the hardworking businesses that operate in the Havant constituency.

PAS24 Compliance

Did you know that Document Q is a minimum requirement on new build? Fitting windows and doors that adhere to PAS24 & Document Q requirements isn't down to your window supplier.

When ordering your windows and doors it is imperative you advise the team of your requirements regarding building regulations. Installers can specify whether or not they want to offer their customers PAS24 compliant products.

To ensure you meet regulations and avoid breaking the law or having costly mistakes, we would like to make you aware of what is required of the installer when fitting building regulation compliant frames.

To comply with the following you must specify:

- PAS24 Windows:**
- Fully Reinforced
 - Twin Cam
 - Glazing Clips
 - Hinge Protectors*

- PAS24 Doors:**
- Glazing Clips
 - 3-Star Cylinder
 - Hinge Protectors*
 - 2 hook, 2 anti-lift pins, 4 roller*

- Document Q Windows:**
- PAS24 Spec as above
 - Trickle Vents
 - 6.8mm Lam to all Accessible Windows

- Document Q Doors:**
- PAS24 Spec as above
 - 6.8mm Lam to Door & Any Side Lights/Windows Within 400mm
 - Spyhole
 - Letterplate with Cowl

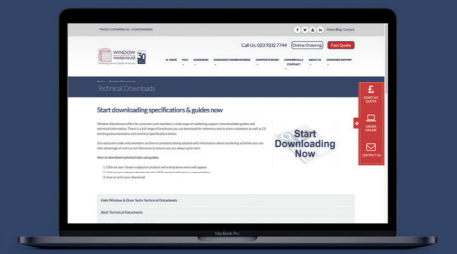

*items marked are supplied as Standard by Window Warehouse

If you'd like to find out more about PAS24 or Document Q Compliance, contact our team and we'll be able to help.

For installers looking to offer accredited products, contact Window Warehouse today.

You can call us on 02392 327 744, fill out our online contact form or email info@window-warehouse.co.uk.

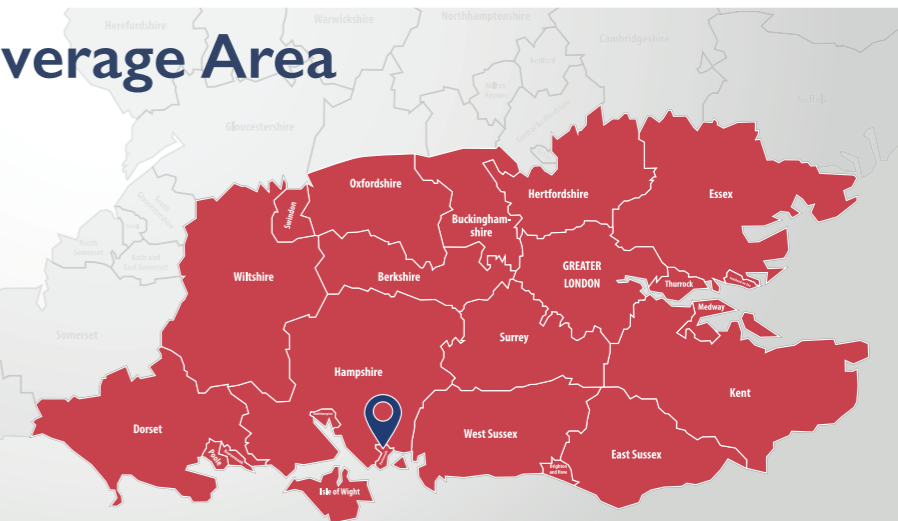

Installers can find copies of our PAS24 compliance certificates and more in our technical downloads section.

Expanding Our Coverage Area

Window Warehouse is heading West, spreading to parts of West Dorset up to Bridport, covering Bath and Wiltshire.

Although we're extending into the west, our team will continue to deliver across the South Coast, Hampshire, Berkshire, Sussex, Surrey, London, the M25 Circular and covering parts of Hertfordshire, Essex and Buckinghamshire. Call Sophie to find out what day your delivery is on.

We NEED Your Pictures!

As suppliers of quality double glazing products, we rarely have the opportunity to be on-site to see the finished product. That's why we're asking Window Warehouse installers to send us your pictures. We are looking to add more installation case studies to our website and would love to see how our products have enhanced a property.

What we are asking installers to do

is send us landscape images of their installations, with details of the products that were installed. A few words would be great if possible. We will be using your projects on our website and our social media channels to showcase how the products look installed. You can send your projects in to info@window-warehouse.co.uk. Who knows, your photography skills may end up being seen by large numbers of people!
