

# BLU™

*316 Marine Grade  
Stainless Steel*

Book Edition B.06

SUITED HARDWARE FOR  
ALUMINIUM, COMPOSITE &  
TIMBER DOORS & WINDOWS

COASTAL

*Shaping the future.*

LIT-BR-B05

## Our New Sense of Purpose

*The shape of things to come*

### Perfect Fit Guaranteed

The basis for our decision making.

### Superior Standards Always

The principle behind our actions.

### Ultimate Lasting Performance

The status we want to achieve.

We think beyond products and today's needs and create standard and bespoke hardware solutions for doors and windows, focussed on tomorrow's requirements.

**Consistently. Every time.**

Why?

To enhance the value of your doors and windows and make them stand out from the crowd.

*Loren Jenner*

Managing Director, Coastal Group

## BLU™ - Your Benefits

### DESIGN

Designed to enhance the aesthetics and performance of your external doors and windows and set them apart from your competition.

### INNOVATION

We're constantly looking at ways to improve the product offering and performance and create new solutions to meet your needs.

### DURABILITY / LONGEVITY

The BLU product range is made from 316 Marine Grade Stainless Steel as standard. Helping resist long term corrosion and keeping your doors and windows looking better for longer.

### SUPER-SATIN FINISH

We include an additional finishing process during manufacture to create a consistent 'super-satin' finish and quality feel.

### COMPREHENSIVE RANGE

A full suited range of quality hardware across your doors and windows.

### VALUE FOR MONEY

Excellent lifetime value, providing you with quality you can afford.

### LIFETIME GUARANTEE

Guaranteed to last as long as the door or window the hardware is fitted to. Providing peace of mind for you and the homeowner.

The BLU™ brand range is owned, manufactured and sold by:

**COASTAL**

*Shaping the future.*

# HOW WE CAN HELP YOU

## Design and Development

We're constantly scouring the marketplace for new consumer trends, end-user needs and technological advances, as well as keeping up to date with the latest regulations. Where existing door and window hardware and designs have become outdated or no longer meet changing customer needs we work to provide you solutions.

Through perpetual innovation our Research and Development Team are always working to move the door and window industry, and your business, forward by being ahead of the curve in terms of materials, products, fixtures and finishes.

Long-term value is what we design, develop and deliver to you.

## Bespoke Solutions

Looking to source the right door or window product to fulfil your need, or one which meets your high performance standards? We're versatile and tailor our way of working to suit your individual needs.

Through combining our skills and capabilities we work with many large system houses, high-end joinery manufacturers, fabricators and architects to provide tailored products and solutions, like we can for you, as and when needed.

We're clear and focus on your priorities, and always aim to deliver the best possible solutions in the easiest possible way. How? By focussing not just on 'doing good', but also on 'feeling good' and caring about what you want, delivering it in the most appealing way.

## Next Day Delivery

Great Service and Fast Delivery are as important to you as they are to us and we continue to invest to provide you with an industry-beating service. Our new Distribution Centre has enabled us to increase and improve our stockholding and our 'On Time In Full' delivery service.

All of our core product range is held in stock for fast delivery. All stock item orders placed before 3pm are dispatched the same day and are usually delivered the next working day. If required, your delivery can be sent straight to site or an alternative location, e.g. to your client.

## In-house Design and Build - Delivering You Quality

We're fanatical about ensuring our door and window hardware provides ultimate lasting performance. To ensure we deliver you hardware which lives up to our brand values, and doesn't let your brand down, we retain control of each step of the process - from design, to sourcing quality components from around the globe and build of the product.

Our range of door and window hardware designed and built in-house in the UK from components manufactured by specialists around the globe continues to grow - providing you with peace of mind that you're purchasing quality hardware from a stable supply chain.

## Some examples of BLU™ products built in-house

Shown here are the Regent Door & Window Handle Range and the LP400 Letter Plate Range going through assembly and final quality checks.

These are designed and built by our in-house teams using components manufactured for us by specialists from around the globe.

Once passed and approved they're packaged up and our 'Quality Seal' is applied, ready for delivery.

Ensuring you receive the high quality products your doors and windows deserve.

## The People Behind the Brand

Our team of hardware specialists are here to help and provide you with the best solution for your project.

As a customer said *"Coastal actually care, they know what they're talking about and can give you advice".*

## Talk to us:

### CUSTOMER SERVICES TEAM

Contact the Customer Services Team for placing orders or any technical queries on [sales@coastal-group.com](mailto:sales@coastal-group.com) or 01726 871 025.

### SALES TEAM

Contact the Sales Team to arrange Face-to-Face visits or Video Calls on [sales@coastal-group.com](mailto:sales@coastal-group.com) or 01726 871 025.

### FINANCE TEAM

Contact the Finance Team for accounts queries on [accounts@coastal-group.com](mailto:accounts@coastal-group.com) or 01726 871 732.

*With your ongoing support*

## Visit our New Brand Centre

Looking to develop new door or window ranges? Like to see and feel the quality of our product? Or have a bespoke hardware requirement you'd like to discuss?

Visit us in our new Brand Centre where we have a whole range of door and window hardware and production models on display for you to try for yourself.

BRAND CENTRE

# The difference between 202, 304 & 316 Grade Stainless Steel

Element %	202 Grade	304 Grade	316 Grade	Implications
Carbon	0.15	0.08	0.08	Increases the corrosion resistance
Silicon	1.00	1.00	1.00	–
Manganese	7.5 to 10.0	2.00	2.00	Affects the magnetic characteristic and hardness of Iron
Phosphorous	0.06	0.045	0.045	–
Sulphur	0.03	0.03	0.03	–
Chromium	17.0 to 19.0	18.0 to 20.0	16.0 to 18.0	Addition of 12% forms stainless steel from ordinary steel. Removes the corrosive effect of Carbon. Forms a passive film which prevents oxidation and consequent corrosion.
Molybdenum (MOLY)	NIL	NIL	2 to 3	Molybdenum increases the corrosion resistance. It has a superior tensile strength at high temperature as compared to 304 Grade Steel. This element can resist major chemical reaction and thus is a very costly element.
Nickel	4 to 6	8.0 to 10.5	10.0 to 14.0	Nickel provides corrosion resistance, increases strength at both high and low temperature, increases toughness at low temperature and lowers the effects of work hardening. A higher percentage nickel content makes the steel a superior quality.

The table above presents the main elements (forming the chemical compositions) of 316 Marine Grade Stainless Steel compared to other cheaper grade steel such 304 or 202.

## The benefits of 316 Stainless Steel

Where corrosion levels are high, such as coastal environments and in acidic timber, commonly used metals such as zinc and 304 stainless steel are not able to stand up to the elements and corrosion can quickly start.

However there are many corrosive elements in the atmosphere wherever your doors and windows are, situated on the coast or in a city.

316 Marine Grade Stainless Steel is stronger and has higher levels of corrosion resistance than 304 Stainless Steel. That is why we use 316 Marine Grade Stainless Steel as standard on all BLU™ products.

So wherever your doors and windows are installed, by fitting BLU™ hardware you can have peace of mind your hardware will last at least as long as your doors and windows.

# Our Finishes

Our range has been carefully developed and refined over many years to bring you a wide selection of product finishes which meet market demands for both classic and contemporary styles.

One of the unique features of our BLU range is its anti-corrosive properties and, with a little love, care and maintenance, our hardware range will last for many years to come. BLU Hardware is designed to last in both internal and external applications.

### Satin Stainless Steel SSS

Raw 316 Marine Grade Stainless Steel with an extra fine finishing processes applied to give it our unique 'super-satin' silky finish.

Suits classic styles just as much as the modern contemporary look.

### Polished Stainless Steel PSS

Raw 316 Marine Grade Stainless Steel polished to perfection to ensure a stunning mirror smooth reflective finish.

Typically used on classic period designs.

### PVD Stainless Satin Brass PSB

Our 316 Marine Grade Satin Stainless Steel with a PVD Brass coating applied to it to give a warm matt finish which looks equally at home with classic or contemporary styles.

The PVD (Physical Vapour Deposition) coating provides an additional extremely hardwearing protective layer to the hardware and is also designed to help prevent discolouration.

### PVD Stainless Polished Brass PPB

Our 316 Marine Grade Polished Stainless Steel with a PVD Brass coating applied to it to give a warm polished to perfection finish which is synonymous with classic period styles.

The PVD (Physical Vapour Deposition) coating provides an additional extremely hardwearing protective layer to the hardware and is also designed to help prevent discolouration.

### PVD Stainless Satin Black PBK

Our 316 Marine Grade Satin Stainless Steel with a PVD Black coating applied to it to give a distinctive matt finish providing excellent aesthetics for both contemporary and traditional styles.

The PVD (Physical Vapour Deposition) coating provides an additional extremely hardwearing protective layer to the hardware.

### Matt Smooth Black MSB

316 Marine Grade Satin Stainless Steel with a Matt Smooth Black coating applied to it for a look which works well for both traditional and contemporary styles.

### Oil Rubbed Bronze ORB

316 Marine Grade Satin Stainless Steel with an Oil Rubbed Bronze coating applied to it to provide a deep, warm matt look.

### White WH

316 Marine Grade Satin Stainless Steel with a Matt Smooth White coating applied to it providing that clean contemporary look.

# Pull Handle Range

- Manufactured from 316 Marine Grade Stainless Steel.
- Heavy duty 1.5mm wall thickness for a superior feel.
- Brass bush ferrules for enhanced durability of fixing.
- Back-to-back, bolt, or secret fix options.
- Designed with no middle stem to avoid conflict with locking mechanism.
- Unique 'super-satin' finish.

## Why Fit BLU™ 316 Marine Grade Stainless Steel Pull Handles

### Handle Finishing Process

- Extra finishing process provides a smooth, super-satin finish.
- Gives the handle a better quality look, and the smoother finish reduces the potential of tea-staining.

### Finishing of Handle Ends

- CNC Machined.
- Gives a 'precision engineered' consistent look.

### Fixing of Stems to Door

- Brass bush fixing ferrules to prevent handles from coming loose.

### Stem to Handle Detail

- 'Precision engineered' stem ends to ensure an accurate joint between stem and handle.
- Robotic welding ensures a strong joint.
- Stainless steel connecting bolts are used to ensure no corrosion issues or rust leakage.

### Tensile Strength of Handle

- This will help ensure handle doesn't bend over time with opening & shutting door - especially noticeable on handles over 1200mm long and when used on slam-shut doors.

### Corrosion Resistance

- The handle is made from 316 Marine Grade Stainless Steel to give the best resistance to corrosion.

"We are very selective who we work with and go to great lengths to choose suppliers that match our own ethos for high standards in everything we do, as our reputation is only as good as the people we work with,"

"We were introduced to the BLU™ range of door hardware after we were let down by a supplier. Coastal were able to step in and deliver a great service and great product. We were impressed from the start as they not only got us out of a potential hole but were happy to go the extra mile for us.

From a product perspective you are looking at high quality with the BLU™ range – the marine grade stainless steel is second to none both in terms of styling and performance."

*"At Seasalt it's important that every customer has the best possible experience, and that starts with the styling of our shop fronts when it comes to our high street presence."*

*"With many of our shops in seaside towns, the effects of the weather, including corrosion, can be an issue, which is why the BLU™ hardware range was chosen."*

*"The appeal of the styling combined with the fact that every product is manufactured using corrosion-resistant 316 Marine Grade stainless steel means it is fit for purpose with the added benefit of a lifetime guarantee."*

Seasalt

## Door Handle Handing Method

Handle viewed from inside

### Right-Hand Handle shown

(As viewed from inside the property)

Door handles are handed as viewed from the inside, which hand you would typically use to open the door.

Handles are fixed from the inside - holes are on the internal handle and bolt through to the external handle.

Handle viewed from outside

# Patio Slide Door Handles

- Contemporary, high quality patio sliding door handle.
- Manufactured from solid 316 Marine Grade Stainless Steel.
- Ideal for use where corrosion levels are high such as coastal environments and with acidic timber.
- Part of a suited range of door and window hardware.

# KM9 Series Patio Door Handle

- Durability tested to BS EN 1906 and BS 8424
- Solid backplate for additional strength
- Compatible with Sobinco Penta and Yale locking systems.
- Non-handed design.
- Easy-to-operate latch.
- Various different handle configurations available.

PART NUMBER	PRODUCT DESCRIPTION	FINISH	UNITS
KM905B-SSS	Back-to-back blank plate handles	SSS	Set
KM920B-SSS	Back-to-back lever & Euro cut-out handles	SSS	Set
KM950B-SSS	Internal lever & Euro cut-out handle and external blank plate handle	SSS	Set

## Blank Plate

## Euro Cut-out

Handle can be detached from backplate via fixings on the back of the backplate to change the handing if needed.

Visit [www.coastal-group.com](http://www.coastal-group.com) for CAD drawings

"We chose Coastal's BLU 316 Stainless Steel Patio Handles not only because of their durability for our tough environment, but because they are much better looking than the previous handles. Plus they're more in keeping with the style and environment of the hotel."

Watergate Bay Hotel

# Straight Slide Door Handles

- Contemporary, high quality straight sliding door handle kits.
- Suitable for use with even the largest, heaviest inline straight sliders.
- Adaptable layout enables these kits to be used with different locking systems.
- Available with the pull handle inside and out, or a pull handle inside and a flush pull on the outside.
- Specially designed secret fixing method for multi-chambered aluminium profile.
- Manufactured from 316 Marine Grade Stainless Steel.
- Ideal for use where corrosion levels are high such as coastal environments and with acidic timber.
- Part of a suited range of door and window hardware.

# KM859

"When we looked at the quality, location and style of the development at Carbis Bay, we needed a solution that not only offered faultless performance for the multiple lift and slide doors featured in the lodges, but that really looked at home on such a quality development.

But not only did it need to be aesthetically right, it had to withstand the high corrosive salt environment. There really were only one or two hardware manufacturers in the market that could meet the brief and BLU™ hardware was the obvious choice.

It was the combination of the quality, performance and look and feel that set BLU™ apart. The 316 Stainless Steel finish was also important and with the guaranteed anti-corrosion performance we knew we were recommending a solution that would meet their needs not just now but in the future."

"The Eurocell PVC door frame profile was causing us problems when we were asked to install cylinder pulls due to the extra depth of the rebate. The SE40 not only solved this problem with its special narrow design, but also ensured that we met security standards. It also has the added benefit of a satin stainless finish which matches the bar handles and other furniture on our doors.

The other nice thing is that they are also available in multiple escutcheon/cylinder pull configurations, which gives our customers more options to meet their needs."

Weatherbreak Windows Ltd

# Escutcheons

- Suitable for use with Euro profile cylinders.
- Designed to enhance the security of your door.
- Manufactured from 316 Marine Grade Stainless Steel.
- Ideal for use where corrosion levels are high such as coastal environments and with acidic timber.
- Part of a suited range of door and window hardware.

## KM045 Oval Escutcheon

*"I searched for a long time trying to find a replacement letter plate that would not only stop the rain, but also the cold wind, whilst at the same time matching the rest of the brushed stainless steel hardware.*

*Eventually I saw the BLU™ LP400 Letter Plate which looked just the job to rectify the problems I was having with driving rain and wind coming through my previous letter plate.*

*The LP400 from BLU™ is easily the best letter plate on the market and has really impressed me with it's high quality manufacture and perfect function.*

*Now it's fitted I have total faith that the worst of the Scottish weather is being kept outside."*

Scottish Homeowner

## Door Knobs

- Fixed door knobs for use on entrance doors.
- Strong enough to open and close the door.
- Includes a location pin to help prevent unwanted spinning of the door pull.
- Supplied with bolt through fixing.

## Door Hinges

- A hinge that won't rust or corrode even in harsh environments or acidic timber - all components made from high quality 316 Marine Grade Stainless Steel.
- Won't leak oil or grease - the self-lubricating phosphor bronze washers mean there is no oil required.
- Won't collapse and make your door drop - components are CNC precision engineered to provide a smooth friction operation.
- HQ4 version successfully used on PAS24 tests without the need of a hinge dogbolt - due to the integral strength of the hinge.
- Guaranteed to last for the lifetime of the door.
- Provides complete customer peace of mind and no more expensive site call backs.

HQ4 Hinge & Shimwell Packer Range manufactured from Solid 316 Marine Grade Stainless Steel Components

Shimwell Hinge Packer -  
see page 88  
Solid 316 Marine Grade Stainless Steel

## HQ4/HQ4R Hinge

- Clean lined, triple knuckle butt hinge with a 3mm gap.
- No leaf play ensures accurate and consistent fit.
- Works well with Shimwell™ Hinge Packer System - see page 88.
- Weight capacity - 120kg using 3 hinges.
- Durability tested to 100,000 cycles.

## Lift-Off Hinge

- High quality 316 Stainless Steel lift-off hinge.
- Enables door to be removed without unscrewing the leaf itself.
- Hinge location can be automatically machined at the factory or on-site using a routing jig.
- Self-lubricating phosphor bronze washers to ensure no messy oil leaks.
- Weight capacity - 120kg using 3 hinges.

Note: these hinges are handed.

## HQ4-SEC

### Butt Hinge - Square Corner with Dogbolt

- Security dogbolt feature prevents removal of door leaf if hinge knuckle is attacked.
- Clean lined, triple knuckle butt hinge with a 3mm gap.
- No leaf play ensures accurate and consistent fit.
- Weight capacity - 120kg using 3 hinges
- Durability tested to 100,000 cycles.

PART NUMBER	PRODUCT DESCRIPTION	FINISH	UNITS
HX507-LH-SSS	Half leaf lift-off hinge - left hand	SSS	Each
HX507-RH-SSS	Half leaf lift-off hinge - right hand	SSS	Each

### Full Leaf and Half Leaf Lift-Off Hinge Handing

HX501 and HX507 are handed products - the hinge leaf with the pin is fitted to the frame, the other half with the receiving hole is fitted to the door, allowing the door to be lifted off.

To define hinge handing, view the door with the hinge knuckle facing towards you; if the hinges are on the left then these are left hand hinges as per drawing shown on the left.

## HQ Shimwell™ Hinge Packers

- Your solution to timber doors and windows jamming and binding.
- Unlike traditional packers, the Shimwell will not compress and cause the door/window to sag over time.
- Shimwell™ hinge packers are suitable for use with the BLU™ HY3 and HQ4 hinge variants.
- Shimwells™ should be installed by the joiner when initially fitting the door/window. They enable quick and easy adjustments when the door/window swells, ending the inconvenience of having to plane the door/window down to release the bind. Simply loosen the hinge screws, and remove the 0.5mm, 1mm or 2mm Shimwells™ to bring the door/window back into alignment.
- Each Shimwell™ moves the hinge pin in between 0.5 – 2.0mm and can be used in pairs to create a larger shim to suit more severe gaps.
- Made from 316 Stainless Steel.

## HQ4 / HQ4R / HQ4-SEC Shimwell™ Packers

## HY3 / HY3R Shimwell™ Packers

Visit [www.coastal-group.com](http://www.coastal-group.com) for CAD drawings

*"The BLU HQ4 Hinge are our hinge of choice due to their high quality look and performance. They are built to last and mean we no longer have the problems of customers coming back to us 3 - 4 years later saying the hinge has fallen to pieces with the constant opening and closing of the door. These hinges have taken our product to another level."*

R & E Falkingham

*"Used the HQ4 recently on door sets 2.4m high x 2.6m wide and the central set were a whopping 4.2m high, with each door weighing 160kg! A good tribute to the HQ4 hinges."*

# FH70

## Tritus™ Flush Lift-Off Butt Hinge

- High quality lift-off butt hinge with pressed flanges to fit into the Tritus Flush Casement Window grooves.
- The 12mm frame groove positions the hinge for extremely quick installation.
- Lift-off feature means the sashes can be sent to site after frame installation, and can be easily lifted off for repainting or renovation.
- Hinges meet the requirements of BS DS EN 1935: 2002 Grade 9: 25,000 cycles / 60kg.
- PBK black finish has been successfully salt spray tested to 1000 hours, test: ASTM B117
- Successfully used in our Part Q Test.
- Made from 316 Marine Grade Stainless Steel.

Note these hinges are handed looking from the outside of the building.

#### Hinge Quantity Chart

The chart above helps you select how many hinges you require based on your sash height & width. The numbers in brackets are the number of hinges required per sash when using triple glazing.

#### Hinge Handing Information

The hinges for this system are handed from the outside. They are cranked and designed to fit the Tritus groove detail, making them a handed product. The bottom part of the hinge with the pin fits into the 12mm groove in frame, with the pin uppermost, the other half of hinge fits into the 17mm groove in the sash with the hole facing downwards.

# Window Handles

- Manufactured from 316 Marine Grade Stainless Steel.
- Ideal for use where corrosion levels are high such as coastal environments and with acidic timber.
- Part of a suited range of hardware.

*"It was an absolute no-brainer for us to choose BLU™ products to use at our Loo With A View conversion! The handles, hinges and other hardware are of the highest quality, in addition to the fact that they look stunning, with their sleek lines and elegant finish.*

*We wanted to use products that wouldn't rust, and wouldn't need to be replaced in a few months, or even years down the line, and we have great faith that we have made the right decision!"*

Property Developer, Cornwall

## Casement Window Handing

Outside the Property

If you require handed hinges, such as the 'Tritus Lift-Off Butt Hinges', the hinges you would need for the 'Left Hand' window drawn above would be 'Left Hand' hinges. Hinges for windows are handed looking at the window from outside the property.

Inside the Property

The handle required for the 'Left Hand' hinged window drawn above is a 'Right Hand' Handle. Handles are handed looking at the window from inside the property. The handing for the handle shown on the drawing above is a right hand - the hand you would typically use to open the window.

# Product Care & Maintenance

- Stainless steel does need looking after.
- Like all materials unless cared for properly, stainless steel will become stained or discoloured over time - as the name 'stainless' suggests it is 'stain less' not 'stain free'.
- The best and most effective way to care and maintain your stainless steel hardware is by using our DR121 Stainless Steel Renovation Kit.

## DR121 Stainless Steel Renovation Kit

- The kit includes 100ml stainless steel cleaner solution, 100ml stainless steel conditioner, application pad and gloves.
- The DR121 cleaner is a liquid solution that cleans and polishes, removing contamination, tarnish, tea staining, surface rust and on-site dust and dirt without attacking the metal.
- Used regularly, it keeps stainless steel hardware sparkling clean and looking like new.
- Essential for keeping hardware cleaned and maintained that is fitted on property situated on or near the coast.
- DR121-CO is a neutral liquid conditioner cleaner for use after the metal surface has been cleaned with DR121-CL cleaner.
- The conditioner can also be used for daily cleaning and maintenance of slightly soiled metal surfaces.
- Note the white (scrubbing) side of the sponge is only suitable for use on raw/satin stainless steel and only in the direction of the finishing brush lines on the steel.

PART NUMBER	PRODUCT DESCRIPTION	UNITS
DR121	Stainless steel renovation kit	Per kit
DR121-CL	Stainless steel cleaner only	100ml

# Tea Staining and How To Remove/Prevent It

## WHAT IS TEA STAINING? IT ISN'T RUST!

Tea staining is when the surface of the stainless steel is discoloured by corrosion.

It is a cosmetic issue that takes place on contaminants sitting on the surface of the stainless steel, it does not affect the structural integrity or lifetime of the material.

## HOW TO REMOVE/PREVENT TEA STAINING.

Regular cleaning and conditioning of your hardware will help prevent tea staining occurring as per the care and maintenance guide provided with your product and detailed on the opposite page.

Instances of tea staining can be removed using our DR121 Stainless Steel Renovation Kit shown on page 103.

## Tea stained handle before and after using DR121

Before

The handle shown above in the left hand image is an example of a tea stained handle. The same handle is then shown above in the right hand image following cleaning by our BLU™ DR121 and an application of DR121 Conditioner.

The results speak for themselves with the handle looking like new again.

After

# Hardware Product Care and Maintenance

To help you care for the BLU™ product range please follow the guidelines below.

**During installation and whilst building work is being carried out the hardware should be covered to protect it from dust, dirt and scratching.**

## Immediately after fitting and installation

- Product should be cleaned using a soft cloth and mild soapy water then dried immediately with a clean, soft cloth.

## Monthly Care and Maintenance

- Clean regularly with a soft, dry cloth or duster.
- Rubbing or wiping should be carried out in the direction of the polish/finishing lines, not across them.
- Product should be washed monthly using a soft cloth and mild soapy water then dried immediately with a clean, soft cloth - especially if fitted on or near the coast.
- Fingerprints can be removed by washing product as above.

## Six Monthly Care and Maintenance

- If this product has a polished stainless steel or satin stainless steel finish then our DR121 Stainless Steel Renovation Kit should be used at least every six months to help maintain this product in pristine condition.

This is available from [www.coastal-group.com](http://www.coastal-group.com).

## Please note:

- DO NOT use oily rags or greasy cloths when wiping the product surface.
- DO NOT use bleach, abrasive cleaners, caustic or acid based cleaning materials, or detergents containing chloride, or any other strong household cleaning products.
- DO NOT use abrasive materials, files or other hard objects against the product surface.
- This product should be protected from dust and dirt during any construction work.
- PVD coatings may fingerprint so we suggest during installation of the product that you handle it with clean gloves or cloths to guard against stains or fingerprints. Fingerprints can be removed by washing product with a mild soap and water solution, then dried.
- If a softer metal such as a ring or a key marks the surface, it is possible some of this metal may have been left on the PVD coated surface. In this case use a soft cloth and mild, non-acidic cleaner to remove the soft metal deposit.

*"Coastal have so far provided us with a fantastic service.*

*As a company we constantly strive to provide the best quality products to our customers. Coastal have a range of products that are both on trend and durable.*

*The display board provided for our showroom is well made with good quality working samples. We have already had several customers upgrade to Coastal's products and anticipate many more!!"*

# Hints and Tips to Improve your Project Photography

Do you struggle with taking good photos that showcase the quality of your work? We all fall into the same trap but making a few small tweaks can make a huge difference to the quality of your photograph. We've listed below some points we've found helpful during our own photoshoots.

## Adjusting the image resolution on your phone/camera

- Use the best quality image settings on your phone/camera.
- When sending the photos, please make sure to email them as original files without reducing file size.

## Include as much as you can within the photo

- Holding your phone/camera landscape instead of portrait. Simply turning your phone/camera on its side gives more of an area to work with your photo.
- Try and include as much of the house or room in a shot as possible to allow your viewer to understand the concept of your work better.
- Frame the door/window so that there's some extra space around it. This gives the building context and will focus the eye on your work.

## Photograph from an angle

- Taking the photograph from an angle shows the architectural lines and gives more dimension.
- Choose your angle, kneel down, and take the shot upwards – a shot taken around 100cm from the floor is best. An angled view taken low and from the side will also make a great shot.

## Stabilise your phone/camera by resting it on an object

- Try resting your phone/camera on something, this will help keep the angle straight and stop it from shaking/blurring.

## Watch out for any reflections in your photos

- Try not to catch yourself or any of your equipment reflecting in the glass.

## Be mindful of the weather forecast and avoid using the flash

- Sunshine and blue skies showcase your work at its best. If you are outside and have an outside light source use it, as it will highlight your work. If you are indoors then use as much natural light as possible; open blinds, curtains, etc. and turn the lights on. Whether indoors or out, ensure that your light source is behind you. Avoid using the flash as it tends to result in an awkward reflection or a bad glare.

## Remember to tidy up before you take a photo

- Cleaning the doors, windows and hardware and tidying up both inside and outside before you take your photo will create a much better photo and showcase the quality of your workmanship.

## Take as many photos as you can

- Taking multiple photos will give you a variety to choose from and capture your work from different perspectives. The first photo you take is often not the best one.

# Frustrated with Black Antique hardware? Ask us about DURATIQUE - your ultimate antique hardware, made from stainless steel.

DURATIQUE brings you many  
benefits including:

- No more issues of rusting black antique hardware - manufactured from a base material of Stainless Steel to prevent it corroding.
- No more inconsistent product making it time consuming to fit - CNC machined screw holes ensure consistency of dimensions between fixing points and euro profile cut out.
- No more sagging handles and rattling spindles - high quality dual sprung mechanism and spindle ensures a nice positive action and returns the handle consistently to its original position.
- Part of a suited range of antique door hardware made from stainless steel.

## The range currently includes...

Door handles, letter plates, cylinder pull, centre door knob, door knocker and escutcheon. Visit [coastal-group.com](http://coastal-group.com) for more information or contact us on [sales@coastal-group.com](mailto:sales@coastal-group.com) or 01726 871 025.
